

ENVIRONMENTAL POLICY

The fundamental principles in implementing the Environmental Policy at UMS are:

- Knowing, internalizing, and acting in accordance with the mission, vision, and values of UMS Metal Industry,
- Minimizing potential damage to air, water, and soil in accordance with the ISO 14001:2015 standards adopted as the Environmental Management System, and recognizing the right to life for other living beings in nature,
- Effectively implementing the Environmental Management System to protect the environment and minimize potential damage, fully complying with system requirements and national/legal regulations, conducting risk analyses, and preventing any environmental accidents,
- Keeping waste and emissions (solid, liquid, gas) arising from all manufacturing processes to a minimum, using all resources efficiently, including energy, reusing where possible, and taking all necessary actions to achieve these goals,
- Ensuring the continuity of environmental protection activities with the Environmental Management System, increasing the "Environmental Awareness and Consciousness" of all employees, and making "Environmental Continuous Improvement" a "UMS Lifestyle",
- Ensuring that individual and/or corporate responsibilities related to the environment are recognized and acted upon within the integrated system through continuous education and development,
- Sharing our environmental approach with our customers and all stakeholders to promote the spread of "Environmental Awareness" at national and international levels.
